

PRÄZISIONSWERKZEUGE

**CONNECTORS
ALL TYPES**

**KNURLING AND
MARKING
IN ONE STEP**

Discover the advantages of our tools

Process optimization at the highest level

Optimize your production:

Our tools increase the efficiency and quality of your production processes through continuous development and innovative solutions that are perfectly customized to your specific requirements.

Precision and quality:

Highest precision and quality are our basic requirements. With our wide range of products, which are suitable for different types of machines, we can process your components in just one step.

Durability and cost efficiency:

Reduce your tool costs and ensure trouble-free operating shifts with our wear-resistant and pressure-resistant knurling wheels made of powder metal.

Convince yourself:

Discover the advantages of our products and test the superior performance of our knurling and marking tools for your application.

MARKING AND KNURLING TOOLS

EFFICIENCY, PRECISION AND QUALITY IN ONE STEP - OUR TOOLS

FORM KNURLING SERIES 131

- Quick change of the knurling wheels and carbide pin through click-pin® system

CUT KNURLING SERIES 231

- Perfect efficiency thanks to modularity and versions for different machine types

MARKING WITH SERIES 432

- Ideal for different geometries with changing text

MARKING WITH SERIES 431

- High tool stability guarantees long service life

FORM KNURLING SERIES 161

- Stable knurling process for long components thanks to tangential machining

shop.hommel-keller.de

MARKING WITH SERIES 422

- Compact design, optimised for Swiss-type lathes

MARKING WITH SERIES 131

- Excellent for consistent marking

KNURLING WITH SERIES 191 | 192 | 291

- Force reduction through three-point machining, therefore ideal for thin-walled components

CUT KNURLING SERIES 241

- Precise adjustment via synchronized running adjusting spindle for optimized knurling results

MARKING WITH SERIES 311 | 312

- For marking on flat or conical surface

Application example:
Marked with Series 432 | in a few seconds
